

Arjun Mehta

Principal Frontend Engineer (Angular / Enterprise)

PROFILE

Principal Frontend Engineer with 8 years of deep Angular expertise, specialising in large-scale enterprise web applications in Banking, Insurance, and ERP domains. Expert in TypeScript, RxJS reactive patterns, NgRx state architecture, and Nx monorepo governance. Led frontend chapters of 8–10 engineers, drove micro-frontend adoption, and championed accessibility and performance standards across multi-product platform suites.

SKILLS

Angular	Angular 12–17, RxJS 7+, NgRx, Angular Material, Standalone Components, Signals
Languages	TypeScript 5+, JavaScript (ES2022+), HTML5, CSS3, Sass, SCSS
Architecture	Nx Monorepo, Module Federation (Micro-frontends), Storybook, Design Tokens
Testing	Jasmine, Karma, Jest, Cypress, Playwright, Accessibility (axe-core)
DevOps	GitLab CI/CD, Jenkins, Docker, AWS (EC2, S3, CloudFront), Azure DevOps
Tooling	Webpack 5, Vite, ESLint, Prettier, SonarQube, Husky, Chromatic

PROFESSIONAL EXPERIENCE

Principal Frontend Engineer

Confidential Banking Software Vendor | 03/2020 – Present

- Architected an Angular 16 Nx monorepo serving 9 product modules — retail banking, corporate banking, treasury, trade finance, cards, and wealth — used by 40+ bank clients globally.
- Designed and enforced micro-frontend strategy using Webpack Module Federation, allowing 5 independent teams to release without cross-team coordination.
- Introduced Angular Signals (v17) for fine-grained reactivity in high-frequency data grids — reduced unnecessary re-renders by 73% in live position dashboards.
- Established the internal Design System: 150+ components, design-token sync from Figma via Tokens Studio, automated visual regression with Chromatic.
- Led accessibility uplift programme — brought all 9 modules from WCAG 2.0 A to 2.1 AA compliance; integrated axe-core into the CI pipeline.
- Managed a frontend chapter of 9 engineers; ran biweekly architecture guilds, quarterly roadmap planning, and hiring panels.

Lead Frontend Developer

Insurance Technology Company | 05/2017 – 02/2020

- Led frontend delivery for a commercial lines underwriting platform processing **₹2,400 Cr** annual premium — 80+ dynamic reactive forms using Angular Reactive Forms.
- Reduced page render time by 55% via OnPush change detection, virtual scrolling (CDK), and trackBy optimisations in complex data grids.
- Drove a 14-month AngularJS-to-Angular 12 migration with zero downtime — strangler-fig pattern, feature-flag gating, and parallel running of old/new modules.
- Built a rules-based form-generation engine that eliminated 60% of hand-coded form templates.
- Introduced Cypress E2E suite covering 300+ test cases across underwriting, endorsement, and claims journeys.

Frontend Developer

Enterprise Software Consultancy | 07/2015 – 04/2017

- Delivered 7 Angular 2/4 enterprise apps for Banking and HR clients across Europe and India.
- Built a reusable data-grid component supporting virtual scrolling, inline editing, multi-sort, and Excel export — used across 5 client projects.
- Contributed to open-source Angular Material extensions; PR merged with 2.3k GitHub stars.

SELECTED PROJECTS

Corporate Banking Workbench — [Angular 17](#), [NgRx](#), [RxJS](#), [Module Federation](#), [Angular Material](#)

Multi-product workbench for 1,800+ relationship managers — complex approval flows, real-time position dashboards, audit trails, SWIFT message composer, and trade finance document management.

Micro-Frontend Platform Shell — [Angular](#), [Webpack Module Federation](#), [Nx](#), [Azure DevOps](#)

Host shell orchestrating 8 independently-deployed Angular micro-frontends with shared auth context, event bus, and design-token theming. Enables per-team release cadence.

Underwriting Workbench — [Angular](#), [Reactive Forms](#), [NgRx](#), [Jasmine/Karma](#), [Cypress](#)

80+ reactive forms covering commercial lines risk capture, pricing, referrals, and policy issuance. Rules engine drives conditional field visibility and validation.

Claims Processing Portal — [Angular](#), [Spring Boot APIs](#), [PostgreSQL](#), [Cypress](#)

End-to-end claims portal handling 40k claims/day with role-specific screens for assessors, supervisors, fraud analysts, and finance teams.

Enterprise Design System — [Angular](#), [Storybook](#), [Tokens Studio](#), [Chromatic](#), [Figma](#)

Themable component library (150+ components) used across 6 product lines. Design-token pipeline syncs Figma variables to SCSS variables and Angular theme objects on every Figma publish.

EDUCATION

B.Tech, Computer Science

2011 – 2015

Jawaharlal Nehru Technological University, Hyderabad

CERTIFICATIONS

- Angular — Complete Guide (Maximilian Schwarzmüller, Udemy)
- RxJS — Reactive Angular with NgRx (Udemy)
- AWS Certified Solutions Architect — Associate
- WCAG 2.1 Accessibility Specialist — Deque University
