

Priya Sharma

Senior Mobile Developer (Flutter & React Native)

PROFILE

Senior Mobile Frontend Developer with 6+ years of end-to-end experience shipping cross-platform consumer and enterprise apps on Flutter and React Native. Expert in offline-first architecture, state management, native module integration, and App Store/Play Store release pipelines. Led mobile teams of up to 4 engineers across HealthTech, FinTech, and D2C verticals. Comfortable bridging to backend teams and owning full-stack feature delivery on mobile.

SKILLS

Cross-Platform	Flutter 3.x, Dart, React Native 0.73+, Expo SDK 50, TypeScript
State Management	Riverpod, Bloc/Cubit, Redux Toolkit, Zustand, Provider
Native Bridges	Platform Channels (Flutter), JSI/TurboModules (RN), Swift, Kotlin
Backend / APIs	REST, GraphQL, Firebase (Auth, Firestore, FCM, Remote Config), Supabase
DevOps	Fastlane, GitHub Actions, App Center, Bitrise, Sentry, Datadog
Tooling	Figma (handoff), Xcode, Android Studio, Git, Detox, Flutter Driver

PROFESSIONAL EXPERIENCE

Lead Mobile Developer

Confidential Health-Tech Scale-up | 01/2022 – Present

- Led a team of 4 mobile engineers building and scaling a Flutter wellness app from 20k to 350k+ MAU across iOS and Android.
- Architected an offline-first data layer using Hive + background isolates, enabling full app functionality with intermittent connectivity.
- Shipped native integrations for Apple HealthKit, Google Fit, and Garmin Connect via Flutter platform channels.
- Reduced cold-start time by 34% through deferred widget initialization, Ahead-of-Time compilation tuning, and lazy route loading.
- Built a CI/CD pipeline with Fastlane + GitHub Actions delivering weekly OTA releases and bi-weekly store submissions with zero manual steps.
- Introduced Bloc + Riverpod architecture patterns; reduced state-related crash rate by 61% within two sprints of rollout.
- Partnered with product and design on a complete onboarding redesign — day-7 retention improved from 38% to 57%.

Senior React Native Developer

D2C Brand (Confidential) | 04/2020 – 12/2021

- Owned the full React Native codebase of a fashion shopping app generating **₹12 Cr/month** GMV across iOS and Android.
- Integrated Razorpay, Cashfree, and UPI Collect payment flows; built address book, order tracking, and loyalty points UI.
- Built a dynamic home screen driven by a Firebase Remote Config–powered JSON schema, enabling zero-downtime A/B testing of layouts.
- Implemented deep-link–driven push notifications (FCM) for cart recovery; contributed to a 19% uplift in 30-day repeat purchases.
- Coordinated bi-weekly App Store / Play Store submissions, ASO updates, and production crash triage in Sentry.

Mobile Developer

Product Studio (Confidential) | 06/2018 – 03/2020

- Delivered 9 cross-platform mobile apps across fitness, travel, finance, and EdTech verticals as sole or co-developer.
- Established reusable component library and project scaffold for React Native that cut bootstrapping time by 60% across engagements.
- Mentored 2 junior developers on state management patterns and platform-specific testing approaches.

SELECTED PROJECTS

- Wellness Companion App (350k MAU)

— Flutter, Riverpod, Hive, Firebase, HealthKit, Google Fit

Daily mood tracking, sleep insights, guided breathing, and wearable sync. Offline-first with background sync. Released on App Store and Play Store with 4.7★ rating.
- D2C Fashion Shopping App

— React Native, Redux Toolkit, Firebase, Razorpay, Cashfree

Full-featured shopping app with personalised feed, PLP/PDP, cart, wishlist, multi-payment checkout, order tracking, and dynamic home screen via Remote Config.

Hyperlocal Delivery App (Two-Sided) — [React Native](#), [Expo](#), [Firebase](#), [Mapbox](#), [Stripe](#)

Customer and delivery-partner apps sharing a Mapbox real-time tracking layer, live ETA updates, in-app chat, and proof-of-delivery photo capture.

AI Chat Assistant (Mobile) — [Flutter](#), [Dart](#), [OpenAI Streaming API](#), [Riverpod](#), [SQLite](#)

GPT-4-powered conversational assistant with streaming responses, per-user prompt presets, offline conversation history, and token usage dashboard.

Corporate Field-Force App — [Flutter](#), [Bloc](#), [REST APIs](#), [Google Maps](#), [SQLite](#)

Offline-capable field-force management app for 1,200 agents — daily task lists, geo-fenced check-ins, customer visit reports, and manager approval workflows.

EDUCATION

B.E., Information Technology

2014 – 2018

Savitribai Phule Pune University

CERTIFICATIONS

- Flutter Development Bootcamp — App Brewery (Udemy)
- Firebase in a Weekend — Google Developers
- React Native — The Practical Guide (Udemy)
- Mobile App Security — OWASP Foundation
